Car Stereo Replacement

Steak Electronics

10/27/19

1 Overview

Replacing a car stereo.

2 Work Log

2.1 I2C OLED display

Just for fun, I bought an I2C oled display and are going to use it to display something. Notes on this: Using the adafruit SSD1306 and GFX library (this procedure is well covered in other places), you can load an example sketch and get it running. First thing to change is to remove the Adafruit logo and replace it with my own. Let's do that.
